

Heatmap showing the correlation of gene expression between 15 genes. The color scale ranges from -1 (blue) to 1 (red). The genes are: Rboha, SnRK2, ACO2, HSP70, PR1b, RD29, 13-LOX, P5CS, ERF1, CAT1, CO, SWEET, SP6A, MES. The diagonal is red (1.0 correlation). Rboha and SnRK2 show high positive correlation (red). Rboha and ACO2 show negative correlation (blue).
